

# KORO® FIELD TOP MAKER®

## KORO® FIELD TOP MAKER®

Available in several models:

### FTM 1200 and FTM 1500

Designed and built for fine turf applications, such as golf greens and fairways, lawn tennis, bowling greens, etc.

### FTM 2000 and FTM 2500

For large scale operations, such as turf farms and athletic fields.

### The FIELD TOP MAKER and it's many uses:

- The Field Top Maker is ideally suited for the control of unwanted grasses/weeds such as Poa Annua without the use of Chemical Pesticides.
- While removing the Poa Annua, this machine is also removing the top layer of unwanted contaminants that slow drainage on athletic fields as well as golf course greens.
- While removing the top layer the machine is also removing surface irregularities resulting in a smoother, safer and more level playing surface for athletes to play.
- Baseball Field lip repair/maintenance is made easy with the Field Top Maker. Simply shave the lip on an annual basis to keep the lip from ever developing.
- Removes top layer of unwanted grasses, weeds and contaminants.
- Field renovation simplified.
- Emergency repairs are not a problem with the Field Top Maker.
- One operation removes 2" top layer of root mass without disturbing grade.
- Strip top layer – Install 2" thick cut sod – Play on the field tomorrow.
- Creates ideal conditions for core cultivation and working topdressing into holes.
- Ideal machine for Sprig Harvesting- No need to rework soil- faster regeneration.
- Limited deployment of manpower and equipment.
- Variable depth control, up to 5 cm.
- Verticutting up to 5 cm depth and remove the thatch in to a trailer or collector box with high tip feature.
- Can be equip with overseeder attachment and/or sand screen deck.

KORO machines introduce new developed methodes to renovate and maintain natural turf.

Our goal is to reduce cost, improve the quality and to protect the environment.

Kind regards,

Ko Rodenburg
